

McCloskey International's newest stacker take the stage at AGG1/World of Asphalt

Maneuverability and versatility key attributes of new design

INDIANAPOLIS, IN – February 12, 2019 – AGG1/World of Asphalt visitors are getting a first look at McCloskey International's new tracked radial stacker – the ST80T Radial - that allows operators to switch from tracked to wheel in minutes. The innovative patent pending design on display in Indianapolis, Indiana February 12-14, 2019 at Booth 37070.

Built-in levelling indicators allow operators to position the stacker regardless of the ground evenness, with independent hydraulic jack legs to stabilize once in place. A level gauge allows operators to position the stacker for maximum production. The tires on the ST80T Radial have an aggressive tread pattern for better traction in rough terrain.

Once in place, a hydraulic raise/lower arm allows the switch from track to radial mode in seconds. The stackers feature a unique rear counterweight that counter balances the tracks and wheels, which are behind the stacker's centre of gravity. The design enables a much higher stockpile capacity, with the radial wheels set well back. The rear counterweight also firmly anchors the tail end during radial mode, delivering greater stability to the stacker while in operation.

ST80T
RADIAL STACKER

The ST80T Radial's unique tool free transport design allows the equipment to move freely from site to site without needing to remove the wheels, delivering true portability for multi-site projects and operations.

The McCloskey ST80T Radial Stackers standard features include:

- Tires that have aggressive-tread patterns for more traction in tough terrain
- Hydraulic raise/lower arm allows the conveyor to switch from track to radial mode in seconds
- Level gauge to allow for operation on uneven ground
- Internal wheel drive motors allow radial travel
- Patented counterweight design delivers enhanced stability and safety in operation.

Over the past twelve months McCloskey International has continued to add new dealers across all regions to represent the number of new products that are added regularly to the company's portfolio. Many of these dealers will be attending AGG1/World of Asphalt 2019, and visitors will be able to connect with them during the show and after.

-30-

McCloskey International Limited designs and manufactures innovative crushers, screeners, stacking conveyors and washing systems. Since 1985, McCloskey International has been exceeding expectations with reliable, durable and high performing products. McCloskey equipment is used across industries including aggregate, mining, construction & demolition, waste management & recycling, landscaping and composting to help achieve profitable volumes for customers around the world. For more information on McCloskey visit mccloskeyinternational.com.

*Patent Pending CA, US, EU, AU, JPN, MEX, CHN
