

Reliable Parts and Service Package is Key to Higher Productivity

J.White and Co (TDE) Ltd, based at Rotherham in South Yorkshire has taken delivery of a new McCloskey R105 Finger Screen from the UK distributor, Tamworth based, Aggregate, Processing and Recycling Ltd (APR)

This is the second screen of its type that J.White has invested in, choosing a McCloskey R105 as it was considered to be a cost effective and reliable machine.

J. White are a family business employing 45 staff and have

become one of the leading operators in the region offering a diverse range of services including the bulk excavation and removal of materials from working sites to landfill areas. The company, as well as operating their own fleet of trucks also supply and deliver materials to site, including top soil, sub-soil and hardcore to specification.

The new McCloskey R105 will be based at the company's Rotherham depot and will be employed to separate mainly spoil & rubble, including topsoil screening. The machine will also be utilised within the hire fleet working on contracts with TDE wheeled loader operators who manage the screen alongside their own machine.

Over the years, TDE have been involved with many major contracts for local authorities, large and important companies and massive civil engineering projects and are currently involved in demolition and earthmoving contracts for the school renewal programme in South Yorkshire where the McCloskey R105 Finger Screen will be employed to process recycled material with throughput tonnage of around 500 tons a day, dependant on materials being either wet or dry.
