

KOMPAQ

HIGHLY MOBILE SCREENER

The McCloskey™ Kompaq is a small yet robust machine designed for recycling, composting, topsoil, landscaping, and contract building industries. It features a surprisingly large 8' x 4' (2.4m x 1.2m) double deck, four bearing screenbox to ensure efficient production.

The Kompaq's versatility is truly unique, with the option of a mid-size product conveyor, the Kompaq offers a three way spilt which has seen the machine used in applications as demanding as sizing material after high capacity crushers.

With a high end conveyor discharge height, and the built in turn-table, the Kompaq frees up operators time by providing greater stockpiling options. The unrivalled mobility of this tracked screen allows for quality screening applications where it was previously impractical, resulting in a product that is truly versatile.

SCREENBOX

8' x 4' (2440mm x 1200mm) double deck four bearing screenbox screens material into three products.

HIGHLY MOBILE

The Kompaq's Chassis has enhanced mobility with single speed 12" (300mm) triple grouser.

MAIN CONVEYOR

This is a 1200mm (48inch) three-ply belt and delivers fine product to stockpile.

POWER UNIT

Diesel engine rated at 49 HP (36.3 KW) with diesel tank capacity at 39 US Gal (150L) and hydraulic tank capacity at 48 US Gal (184L).

HIGHER DISCHARGE

Optional stilts allow producers to increase discharge heights as needed.

Engine	49 hp (36.3 kw) Diesel
Transport Height	7' 6" (2.30m) Standard
Transport Length	13' 1" (4.0m) Standard
Transport Width	7' 7" (2.32m) Standard
Weight - Base Model	16,535 lbs (7,500kg)
Belt Width - Fines Conveyor	48" (1200mm)
Belt Width - Mid-Product Conveyor	23.6" (600mm)
Screenbox Dimensions	8' x 4' (2440mm x 1200mm)
