

Love Putting Things Together?

McCloskey International is looking for a Welder Fitter to Build Our Team!

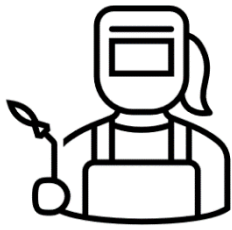

McCloskey International Limited is a world leader in the design and manufacture of innovative Crushing, screening, conveying & wet processing equipment used in the construction, recycling, landscaping & aggregate industries.

Job Summary

All Employees of McCloskey International are expected to contribute to and participate in the continuous improvement of our workplace. The Welder Fitter is responsible for performing all welding tasks and related fabrication and finishing processes according to production needs and the quality standards. Welder Fitters are expected to come to work prepared, on time and ready to contribute 100% to the team in a safe and conscientious manner. This position works under the direction of a Supervisor.

Job Duties

- Reads work orders and manufacturing standards, follows production drawings and assembly instruction, or receives verbal instructions regarding duties to be performed.
- Study engineered drawings and blueprints, determine the materials required, and plan the sequence of tasks.
- Assemble and fit metal sections to form complete units or subunits using welding and other fabrication methods.
- Set up and operate heavy duty metal working machines including torches, drills, grinders, hammers, levels, plasma cutters, and overhead cranes.
- Performs all welding tasks and related fabrication and finishing processes.
- Rig, hoist, and move materials within worksite
- Understands all quality requirements for products and meets those requirements.
- Makes adjustments to meet precise specifications.
- Detect and report defective material to Supervisor.
- Complete any special projects as required. May be assigned to other areas of Operations, based on business or customer requirements.

Job Requirements

This position requires a high school education or equivalency along with 2-4 years previous experience in a similar position. Trade training or Certification in Welding, Mechanics, or a related technical discipline is desirable but not required where candidates demonstrate equivalent work performance based on practical experience.

- Must be able to work in a fast paced, quality-production environment.
- Able to read and interpret documents such as safety rules, assembly, operating and maintenance instructions, blueprints, technical drawings and procedural manuals.
- Must possess good communication skills and teamwork attitude.
- Strong mathematical and mechanical skills required.
- Willing to work overtime as required.
- Able to multi-task projects and meet production deadlines.
- Must provide own helmet and certain trade tools.
- Must have reliable transportation.
