MAKE YOUR MOVE

McCloskey International is looking for an Applications Engineer to Build Our Team!

McCloskey International leads the screening and crushing industry with a complete line of equipment including: crushers, vibrating screeners, trommels and stacking conveyors. Built with power and durability as standards, every product is field-tested before being deployed in a wide range of industries around the world. We currently operate across 3 manufacturing sites in Northern Ireland and we continue to grow our market share.

Job Summary

Reporting to the Senior Technical Manager, it will be the Applications Engineer's role to work alongside the engineering team, key customers and clients to establish technical requirements, assisting with the Bulk Materials Handling/Washing Systems/Crushing and Screening design when required.

The Applications Engineer is responsible for the planning, organisation and directing of the applications process from concept through the design, prototype, manufacturing and commissioning stages. They are also responsible for ensuring that work meets established internal quality standards as well as customer specifications.

Job Duties

- Identify and provide reliable solutions for technical applications to assure complete customer satisfaction.
- Maintain a high level of product knowledge and application.
- Offer input into new product development to ensure we address market opportunity.
- Deliver pre and post-sales support in a helpful and professional manner.
- Listen, understand, and convey customer requirements.
- Maintain an understanding of applicable domestic and international standards to ensure that McCloskey Products comply with these and certifications are maintained.
- Support new product introduction as required.
- Provide technical advice and assistance to customers and distributors when required.
- Prepare technical documentation in line with the company standards and support from the Technical Publications team.
- Assist with / perform tests, startup's and training services.
- Assist with / perform technical/Product training for sales, engineers and customers.
- Prepare technical specifications in line with customer requirements to ensure products meet expectations.
- Assist in the preparation of technical offers.
- Respond to any customer enquiries in a timely and informative manner.

- Complete any special projects as required. May be assigned to other areas of Operations, based on business or customer requirements.
- Report all accidents, incidents or near misses to the Supervisor.
- Observe all legislated H&S regulations as well as established workplace safety procedures.
- Cooperate with the Joint Health & Safety Committee in any Safety Program Review.
- Complete any special projects as required. May be assigned to other areas of Operations, based on business or customer requirements.
- Works in compliance with all Administrative, Health & Safety policies and procedures as per legislative requirements and as outlined in Company policies.

Job Requirements

The successful applicant will be educated to degree standard or equivalent in Design Engineering or relevant discipline with 2 years plus experience in a related industry.

- Ability to read and understand technical drawings and literature
- Previous 3D Autocad experience essential.
- Must be proficient in MS Office (including, Word, Excel, PowerPoint).
- Previous 3D CAD experience advantageous, preferably using Pro-Engineer or Creo.
- Outstanding communication required with excellent written and verbal skills.
- Proven attention to detail and a strong team player with proven experience of working collaboratively with a range of departments.
- Problem solving and time management skills required.
- Self-motivated and organised.
- Strong organization skills and ability to work in a fast moving environment
- Willingness to travel across the globe.
