

The logo for McCloskey International, featuring the name 'McCloskey' in a large, bold, yellow font with a black outline, and 'INTERNATIONAL' in a smaller, black, sans-serif font below it. The logo is set against a green background with a yellow horizontal bar at the bottom.

MAKE YOUR MOVE

McCloskey International is looking for a Project Manager to Build Our Team!

McCloskey International leads the screening and crushing industry with a complete line of equipment including: crushers, vibrating screeners, trommels and stacking conveyors. Built with power and durability as standards, every product is field-tested before being deployed in a wide range of industries around the world. We currently operate across 3 manufacturing sites in Northern Ireland and we continue to grow our market share.

Job Summary

Reporting to the Technical Operations Manager, the Project Manager is responsible for managing ongoing Washing projects, from conception through to installations, liaising closely with internal teams, external contractors and the customer. The successful candidate must have proven project management experience with the ability to manage multiple projects at any time, along with excellent Engineering knowledge and ability to build strong working relationships.

Career Level

- Career Level: Project Manager1(P)
- Job family: Project management (P/M)

Job Duties

- To assume single and trusted point of Customer contact for all assigned projects
- Be fully conversant with all contractual arrangements for each assigned project, meeting with the Sales Manager and Customer as required to clarify any points
- Ensure all target project deliverables are communicated and reinforced to all relevant business functions
- Manage project costs against planned budgetary milestones
- Communicate constantly to ensure both internal and external customers are informed of project progress and issues and ensure all parties are aware of their requirements
- Upsell and manage variation opportunities and ensure all non-planned costs are covered by a variation order where possible
- Ensure extensions of time are submitted where required and feasible
- Ensure all project related plant items and parts have been fabricated, assembled or procured to the highest standard
- Close out final project 'snags' or outstanding works in an efficient manner

- Take full ownership of managing staged payment release within each project
- Continuous Improvement of process and product quality to surpass expectations
- Support sales team in preparing final quotation, and developing project associated costs
- Be involved in final design reviews and interrogation of design before quotation period

Job Requirements

- Ownership of Washing Systems Projects from inception to completion
- Develop and maintain excellent working relationships with internal and external teams along with customers.
- Efficiently manage project costs and report on this.
- Manage multiple projects at once and effectively plan workload to meet specific deadlines.

Education Background

- More than 2 year's project management experience in a relevant industry
- Prince 2 qualification would be an advantage
- Technically competent and have the ability to read and understand technical drawings and information
- Proven organisational skills with the ability to effectively plan, organise and control large engineering projects
- Excellent financial awareness
- Ability to create detailed programme of works using Microsoft Project or similar.
