

Summary		CONFIDENTIAL
----------------	--	---------------------

Reporting to the Senior Quality Manager, the SQM will work closely with the Supply chain and Production teams of McCloskey International, striving for excellence in supplier quality performance and continuous improvement. SQE will ensure that New and existing Suppliers have implemented the required processes to meet McCloskey quality standards and are regularly audited to ensure continued compliance. Supplier Corrective Action Requests are raised for relevant issues and closed out effectively.

Main tasks & responsibilities	Location/Site	Department
<ul style="list-style-type: none"> • Create, implement, and manage a risk-based Supplier Audit Schedule. • Schedule, organise, plan, conduct and report on all assigned supplier audits as per schedule, ensuring record keeping of all audit activities. This will include auditing both on site at supplier, and remotely. • Develop and manage the supplier corrective action processes, being the company contact point for such matters with both internal stakeholders and suppliers. • Provide input to the QA monthly reporting, by providing production management with regular status updates and KPI measures. • Management of poor performing suppliers to improve their performance to the required level. • Support the QA initiative to imbed a QA culture throughout the organisations.
