ELECTRIC & DUAL POWER SOLUTIONS

POWERING PERFORMANCE. DRIVING SUSTAINABILITY.

McCloskey's electric and dual power solutions deliver the performance you expect, with the efficiency today's projects demand.

Designed to reduce fuel consumption, lower emissions and operating costs, our electric and dual

power solutions maintain the power, durability and productivity McCloskey equipment is renowned for. Whether operating in urban environments, on regulated sites or within hybrid fleets, these machines provide flexible, future-ready performance without compromising output.

From high-capacity jaw crushers and high-energy screeners to versatile stackers, McCloskey's electric range is engineered to keep production moving while supporting a more sustainable approach to material processing.

JAW CRUSHERS: HIGH-CAPACITY PERFORMANCE. ELECTRIFIED.

Built on proven McCloskey jaw crusher platforms, the J4E and J6E deliver uncompromising crushing performance with the added efficiency of electric drive technology. Designed for demanding applications, these machines combine powerful single toggle jaw systems with optimised material flow and reduced environmental impact.

Model	Power Type	Feed Opening (width x gape)	Main Stockpile Height	Side Stockpile Height
JAW				
J4E		1,060 x 700 mm (42" x 28")	3,912 mm (12' 10")	3,440 mm (11' 3.6")
J6E		1,200 x 864 mm (48" x 34")	4,730 mm (15' 6.3")	3,990 mm (13' 1")

SCREENERS: HIGH-ENERGY PRECISION. DELIVERED.

Built for high-energy performance in demanding applications, McCloskey's dual power screeners deliver precise material separation with consistent throughput. Engineered for efficiency and flexibility, they combine robust construction with adaptable power options to support reliable operation across a wide range of site conditions.

STACKERS: EFFICIENT MATERIAL HANDLING. POWERED YOUR WAY.

Designed to integrate seamlessly with crushing and screening operations, McCloskey's electric and dual power stacker range delivers reliable material handling with reduced fuel usage and lower operating costs. With flexible power options and robust construction, tracked, wheeled and feeder range offers dependable performance across a wide range of site conditions.

ENGINEERED FOR INSIGHT. DESIGNED FOR UPTIME.

The latest 365SiteConnex, powered by Tedd Engineering, comes standard on all crushers and is available as an option on all other machines. Designed for straightforward setup and intuitive use, it delivers secure, real-time visibility across your fleet, keeping you informed and in control wherever your machines operate.

Monitor performance, track utilisation and downtime, and access remote diagnostics through a clear, user-friendly interface. With actionable insights at your fingertips, you can support proactive maintenance, reduce unplanned stoppages and maximise uptime across every project.

GENUINE PARTS. GENUINE ADVANTAGE.

MPP Aftermarket delivers premium wear parts for McCloskey's electric and dual power crushers, screeners and stackers, engineered for precision fit, reliability and long service life. Every component is manufactured to exact OEM standards, ensuring consistent performance in demanding applications.

With a global parts inventory, supported by factory-trained technical experts and dedicated on-call support teams, you receive the right component when needed, minimising downtime and keeping operations productive and profitable.
